

# Travel the Mighty Fraser River, One of the World's Great Salmon Rivers.

Starting in the Fraser's headwaters near Mount Robson, the course takes you the length of the river by canoe, raft, shuttle van and on foot. Learn about stewardship, build your network, hone your leadership skills and work on your own community sustainability project.

You will return home having developed a new relationship with the Fraser, a better understanding of river issues, a vision for change, and the skills and ability to make a difference in your community.

**Rivershed**  
Society of BC

The Rivershed Society of BC, a non-profit charity, was founded in 1996 to inspire people to care for and about riversheds. We have a vision of salmon flourishing in rivers, and people flourishing in communities.

The health of the Fraser River, one of the world's great salmon systems, is being threatened by:

- climate change;
- habitat destruction;
- pollution, and;
- resource exploitation.

The RSBC is looking for passionate advocates interested in conserving, protecting and restoring the Fraser River Basin's 34 intricately linked rivershed ecosystems.

Headwaters to Sea  
with the

## SUSTAINABLE LIVING LEADERSHIP PROGRAM

A 29-day experiential education program for advocates of sustainable living.

## Journey the Route of the Salmon, from Headwaters to Sea.

Journey 1,400 km down the Fraser River, one of North America's most diverse river basins.

Engage with peers, facilitators, and the RSBC's extensive network of community leaders as you pass through their communities. Explore sustainable living, learn about watersheds, salmon, food security, resource use and how to lower your eco-footprint. Team building, conflict resolution, communication and critical thinking skills are integral to the SLLP.

You travel through ten of BC's fourteen biogeoclimatic zones and spend evenings camping and preparing meals on the banks of the Fraser River. Breathtaking scenery greets you along the way, from ancient rain-forests and grasslands, to sage brush and floodplain.

### **PASSION**

We are looking for passionate advocates actively promoting sustainable living within their Fraser River Basin communities.

### **COMMITMENT**

The SLLP is geared to activists, teachers, naturalists, film-makers, biologists, fisheries technicians, urban planners and those with a keen interest in tourism, stewardship and sustainability.

On the trip, participants commit to designing a community action project, which they will implement upon returning home from their Fraser River trip.

Learn about the Fraser River through an unforgettable adventure.

### **CHANGE STARTS HERE**

Personal leadership is the first step to community action and change. Supported by RSBC's network of SLLP alumni and staff, you return home having developed a new relationship with the Fraser River, a better understanding of river issues, a vision for change, and the skills and ability to make a difference in your community.

If you would like to join a network of sustainable living advocates focused on restoring, improving and maintaining the health of the Fraser River, the SLLP is for you!

**Application deadline: April 30.**  
**Program runs July 19 - August 16, 2019.**
